

Brück is an internationally leading forgemaster, with worldwide 1.200 employees, that provides technically sound solutions, innovative products and creates additional value in mutual interest with our customers, resulting in being a preferred supplier within the oil, gas and (renewable-) energy sector, especially in relation to product engineering, ringrolling and forging.

For the Calculator with strong commercial and technical background, we offer the following challenging position at our office in Echt (NL).

## Calculator

Job description:

The Calculator independently composes calculations and offers for project and product enquiries.

Duties and responsibilities:

- Translating specifications and design drawings to cost price;
- Calculating the needed amount of material;
- Composing calculations and calculating cost prices;
- Requesting offers at suppliers;
- Composing offers for customers;
- Discussing calculations with the Project Engineers and Sales Engineers;
- Describing the welding methods in cooperation with the suppliers;
- Maintains good communication with his colleagues and suppliers;
- Administrates his own projects, duties and hours;
- Elaborating alternative technical solutions;
- Collecting and administrating received information;

Candidate requirements:

The Calculator possesses an understanding in figures, is cost conscious and is aware of the competing and supplying companies in Brück's business. The Calculator works accurate and detailed, and knows to effectively translate design drawings into the actual situation. The Calculator dares to be critical and can clearly and openly communicate with multiple parties (internally and externally).

- Fluency in at least English, preferably also German;
- Minimally a Bachelors Degree of Mechanical Engineering;
- Familiar with the oil, gas, (petro-)chemicals and renewable energy industries;
- Minimum 5 years work experience in mechanical engineering;
- Knowledge of the market and the market prices;
- Critical, analytical and result driven;
- A teamplayer;
- Strong commercial capabilities and intensions, combined with technical background that assures understanding of the companies' product range and offerings;
- Strong customer focus and ability to Multi task under stressful circumstances;
- Ability to plan and organize the work in a continuously changing environment.

We offer:

- The unique possibility to be part of our World and increase your personal knowledge and skills level;
- Excellent primary and secondary conditions.
